

Ensuring Success Through Our Integrated Safety Services

Delivering high-quality, globally compliant pharmacovigilance services

to support both investigational and market-authorized products throughout the asset life cycle.

PPD's integrated safety services team is well-positioned to coordinate **end-to-end** PV activities. We provide oversight of day-to-day pharmacovigilance operations, including safety interactions with regulatory affairs, clinical development, medical affairs and quality assurance. We also can provide a **qualified person for pharmacovigilance** (QPPV) and **pharmacovigilance contacts** at a national level, where required. Our team is dedicated to designing and delivering optimal pharmacovigilance solutions to safeguard your regulatory compliance.

Our global pharmacovigilance team offers a portfolio of safety solutions, including:

Collaboration Drives Success

Our flexibility makes us your ideal partner, delivering a complete global pharmacovigilance and risk management solution.

- Global network of scientists and medically trained staff located in more than **15 countries**
- Process more than **400,000 ICSRs** each year
- Provided comprehensive signal detection support for over **30 products**
- Delivered ICSRs to more than **3 million recipients** including regulatory authorities, ethics committees and investigators, with an on-time submission compliance rate of greater than 99%
- Prepared more than **1,300 aggregated safety reports**

PPD® FSP – Delivering all pharmacovigilance (PV) solutions in an FSP model
